

Scanning:

- Professional scans from negatives, transparencies, or prints.
- Virtual drum scanning ensures optimal scanning quality while leaving the original untouched.
- Scans can be done in the enhanced (16 bit) mode, which doubles the output file size.
- All Grayscale scans 16bit; Color default is 8 bit RGB Adobe 1998.
- All scanned images are cleaned for imperfections that are not on the original image.
- Scans are delivered on a CD as a TIFF file with an embedded profile.
- 25% Artist Discount on scanning

*Pricing is based on the number of MB (Megabytes) in the file generated by the scan.

Size of Image File	Cost
Up to 50 MB	\$25
Up to 100 MB	\$35
Over 100 MB	\$50

Examples of output file sizes at 300 dpi:

	8.5" x 11"	11" x 17"	16" x 24"	20" x 24"
Grayscale	8 MB	16 MB	33 MB	42 MB
RGB	24 MB	48 MB	100 MB	124 MB
CMYK	32 MB	64 MB	132 MB	165 MB

Studio Captures

-In our photo studio, we can create high-resolution copy scans of virtually any size artwork as well as any type of metallic, transparent, and 3-dimensional work. With this service we offer years of professional experience shooting and lighting artwork, and our direct digital copy camera setup will produce scans that are up to 100 megapixels (300MB).

Size of Artwork	Cost
Up to 24"x36"	\$75
Over 24"x36"	\$100

***Additional charges may apply with any special handling and/or lighting.**

***Please call for a quote on quantity orders or special projects!**

Post Production / Prepress:

- Color correction – change the brightness, values and hues of any part or all of the image.
- Prepress color work – color correction, clipping paths, drop shadows, etc.
- Image restoration – remove dirt, scratches, tears; restore faded colors.
- Image composition – creative after effects.
- Hourly rate is \$100 - \$150 per hour, based on the complexity of project, billed in 1/4 hour increments.
